To Whom It May Concern:

As founder and owner of Club Bow-Wow, I wanted the best flooring material for our state-of-the-art facility, but at a reasonable price. After researching flooring options and consulting with my architect, Brownhouse, we decided on Protect-All Flooring product.

Protect-All provided our facility with an environmentally-friendly, yet attractive flooring solution. More importantly it protects pads and joints of our dogs, and it is non-slip even when wet. This heavy-duty and durable floor was the best fit for our needs and the comfort of our guests.

Protect-All has helped maintain our theme as a premium doggie day care and state-of-the art club designed specifically for our four-legged friends.

David Venegas was knowledgeable, helpful and responsive to our needs. I'd recommend David and Protect-All to anyone who needs a durable, low maintenance and attractive flooring with excellent customer service.

Sincerely,

Renee Brantner
Owner and General Manager
